

How to install Volvo VIDA

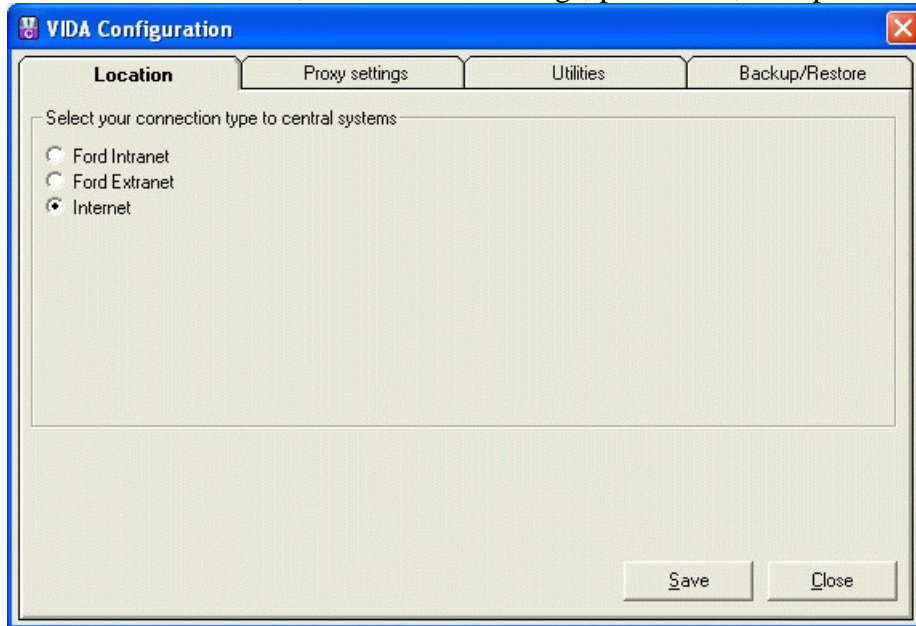

1. Put DVD with VIDA into PC DVD drive, setup will automatically start. If it is not, run setup.exe manually from *VIDA_Lang_Independent\dvd_extra\dvd\Vida_dvdheader\Scripts\Main* folder: Setup will run:

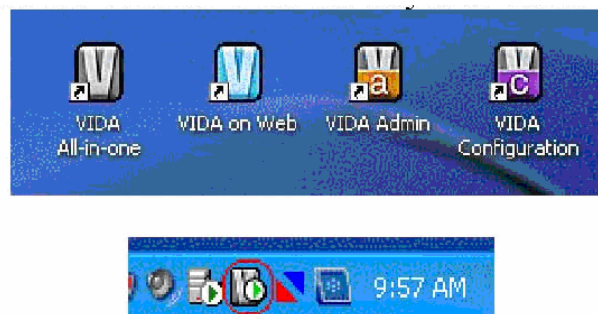

2. Select «Vida All-in-one», press *Next* to start PC test. **VIDA cannot be installed on Windows XP Home, use XP Professional instead!** If PC is suitable for VIDA, window asking for destination folder appear. Accept default value (C:\VIDA) and press *Next*.

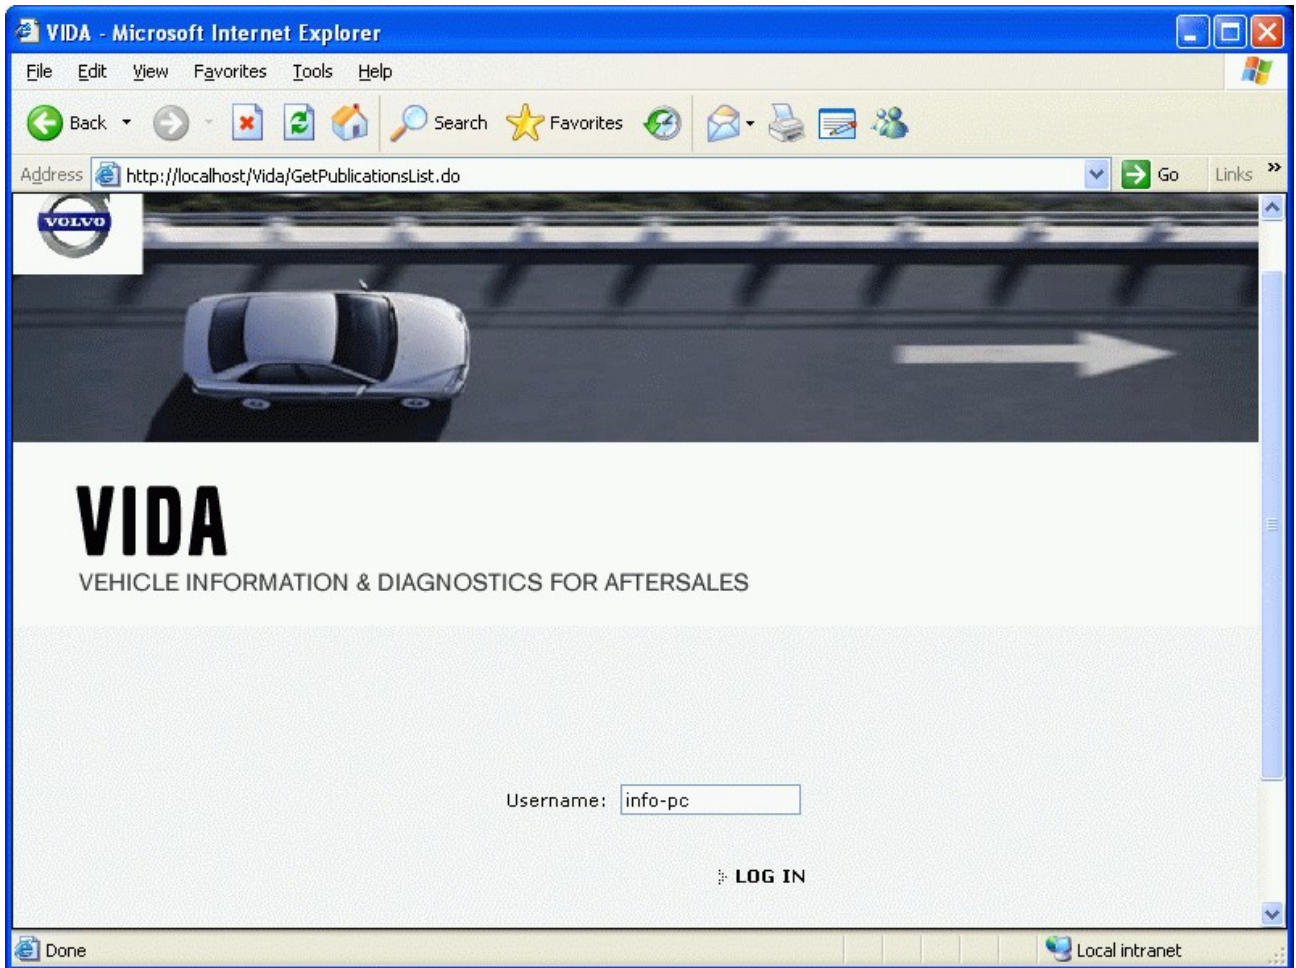

3. Accept License agreement and press *Yes*. Installation will begin, it will take about 1 hour. After that configuration window will be shown, leave default settings, press *Save*, then press *Close*.

4. After installation finish, setup will ask to restart your PC or not. Select «Yes, I want to restart my computer now», PC will reboot.
5. After reboot you should see VIDA icon in the tray and VIDA shortcuts on the desktop:

To run VIDA double click on *VIDA All-in-one*. Internet Explorer will open web page, **USE LOGIN INFO-PCTO ENTER THE SYSTEM:**

If during work «WSL Login» window appears, just press Cancel, this is because this VIDA version has no online features:
